

## TC1461 ADA Compliant Global Heavy Duty Door Closer

The TC1461 is a heavy duty closer designed for maximum versatility and fast installation. It is recommended for use on heavy duty commercial, architectural and institutional applications. Closers with non-hold open arms are UL listed for "A" label fire doors.

The unique hole pattern offers a variety of options and features for both new construction and retrofit / tenant improvement installs. Supplied with a slim cover, standard duty arm and a parallel arm bracket to accommodate all applications. Comes with all fasteners, brackets and soffit plates for versatility.

Global Series TC1461 Door Closers are non-handed and have individual adjustments for sweep speed, latch speed, and backcheck cushioning. They are tri packed for regular, top jamb or parallel arm installations. They fit 7 1/2" x 1" mounting hole pattern, direct fit replacement for a LCN 1461 (LCN 1460 series).
